

Campus Climate Report

At the end of 2024, ADL, Hillel International and College Pulse conducted a survey of 2,170 Jewish and non-Jewish college students nationwide to gather insights into the direct experiences and perceptions of antisemitic behaviors and environments on campuses. The below visualizations, alongside quotes from the surveyed students, underscore the urgency for academic institutions to not only acknowledge the unprecedented scale of the problem but also actively implement comprehensive measures to combat antisemitism on campuses and safeguard their campus communities.

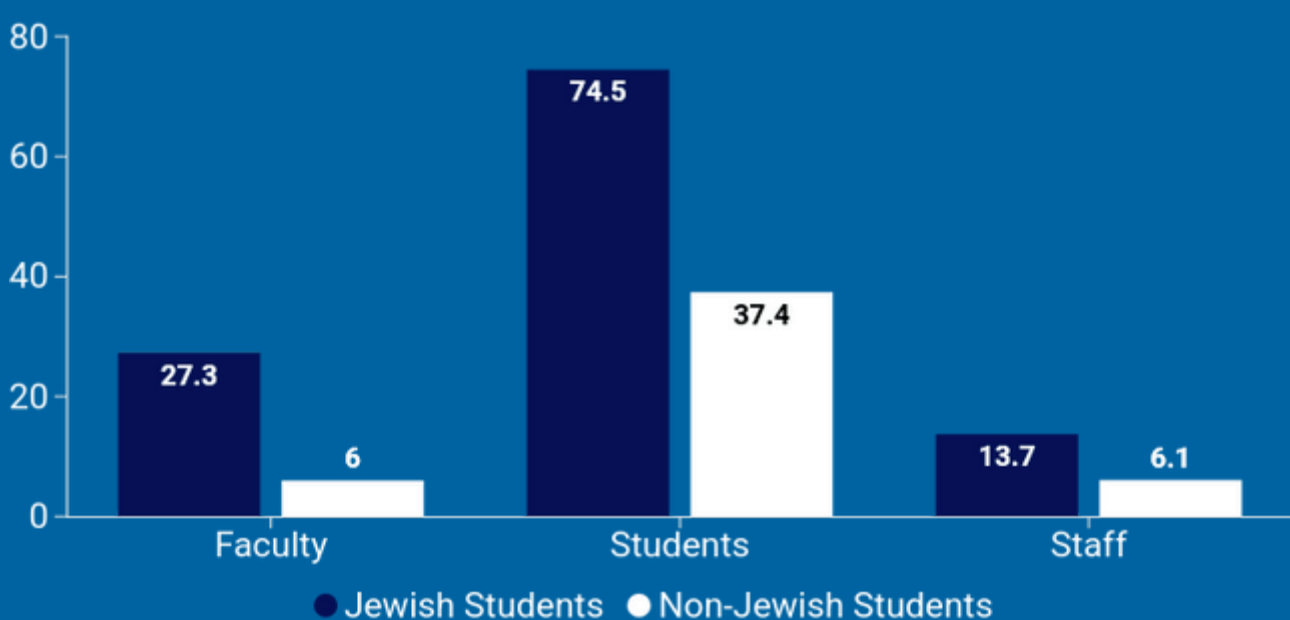

Incident rates, Jewish vs. Non-Jewish students

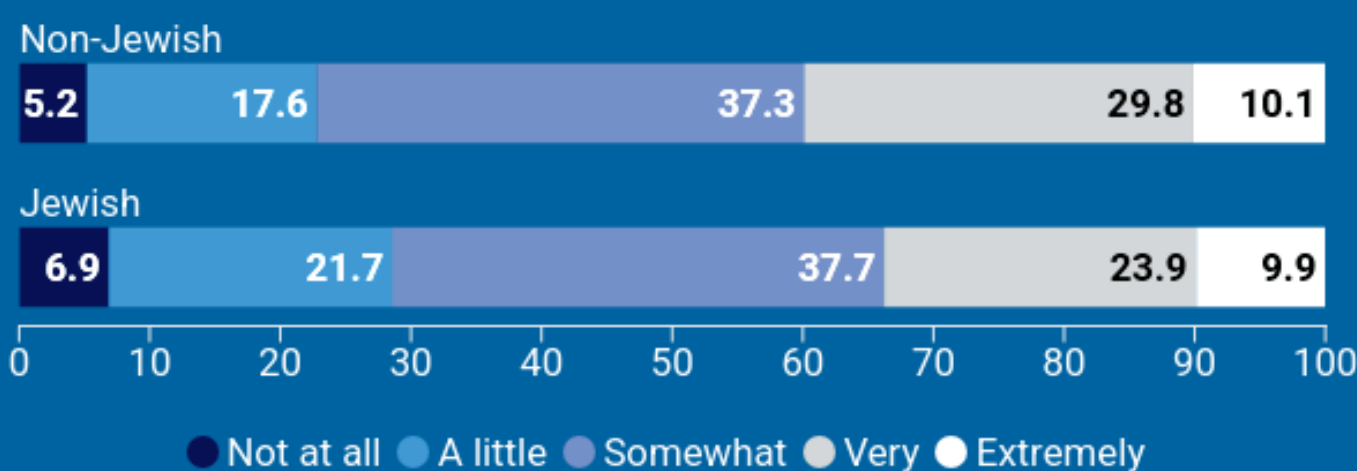

I do not believe the administration is providing the safety and security desperately needed for its Jewish students. I have been a victim of antisemitism on this campus, and sadly, these incidents have become a new normal for my Jewish peers."

Have you observed anti-Jewish activities or statements from any of the following since 10/7?

It has been the most truly horrific year I have ever experienced."

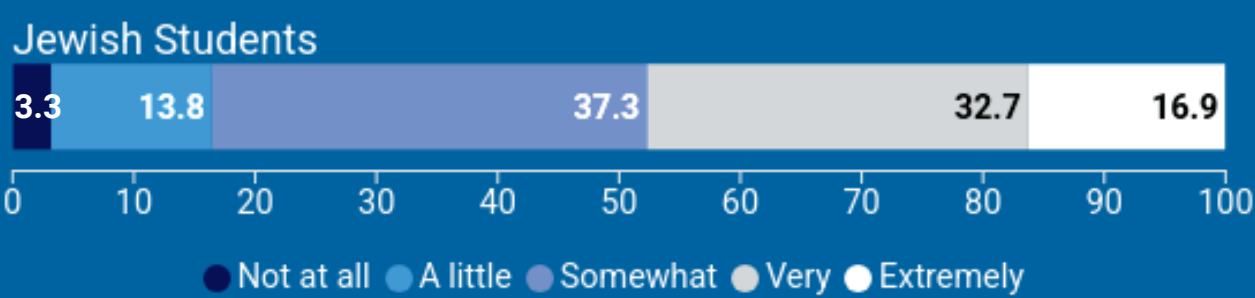

How confident are you in your university's ability to prevent anti-Jewish incidents?

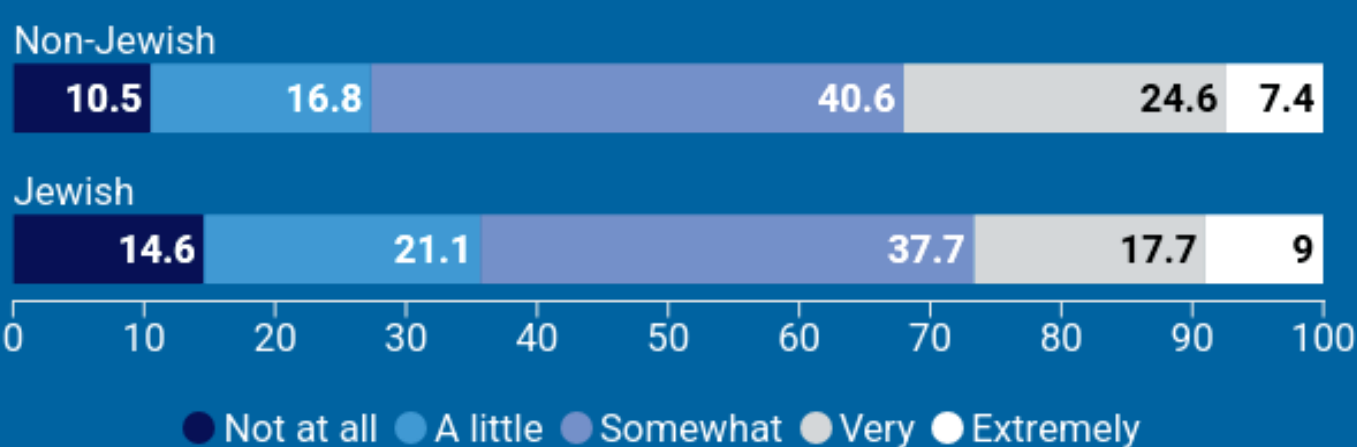

Last year the anti-Jewish movement was so strong here during the protests. The word 'kike' which is an anti-Jewish slur was written all over campus."

Generally, how comfortable are you with others on campus knowing you are Jewish?

There was no respect for the safety of all students. Antisemitism was rampant and the campus became extremely polarized. Attacks both verbal and physical were common and Jewish friends had to hide their faith to be socially accepted."

Generally, how comfortable are you with others on campus knowing your views of Israel?

The Israel flag was burned and seen as a symbol of hate, when in reality it is in Jewish heritage."
